

**ALDERNEY LANDING THEATRE**

**LIGHTING GRID - UPPER LEVEL**

- Circuit Numbers in 14pt ARIAL: e.g.104
- Audio MIC and SPEAKER connectors in 12pt COURIER:e.g.M-65,S-09
- 120V = House Power Outlet (common ground)
- CC = CLEARCOM Connection

SCALE 1/4" : 1'

- Catwalk lower pipe height - 23' 4" (grid height)
- Catwalk waist level pipe height - 26' 8"

- 2 actors catwalk pipes lie precisely below SL and SR pipes and extend outward 53" from the upstage wall depicted.
- Actors catwalk lower pipe height - 13' 8"
- Actors catwalk waist level pipe height - 17'

Pipe is 2" O.D.

Please Note: Stage line (ie. actual point where carpet flooring of the house meets the DS edge of the wooden stage floor) is marked with a double ended arrow line.

-Leg curtains can be opened to a maximum width of 7'. Typically, a lamp can be underhung in the leg position as the curtain pipe is suspended below the lamp (or grid level or "catwalk lower pipe".

-The Midstage traveler truss allows only enough room to down-yoke a lamp and focus it in the upstage direction. There is no clearance to focus as DS back-light.

The beams (below) are hanging obstructions where depicted.
